

What Drives us?

Our passion lies in designing and implementing advanced irrigation systems that not only conserve water but also increase yield and minimize environmental impact. **We want your crops to thrive!**

With our expertise in Project Engineering, we elevate horticultural irrigation to new heights, integrating the latest technologies and innovative methods to transform your horticultural space into an oasis of efficiency and productivity.

Whether it's greenhouses, fields, or vertical farms, we are ready to realize your vision and elevate your horticultural enterprise to new heights.

Our business vision embraces the combination of CTO principles and customized solutions, enabling us to work efficiently and cost-effectively.

Our core competencies include

- Project Engineering
- Unit design and production
- Sustainable Irrigation systems
- Strategic Water Management

With a passionate team of employees from a wide variety of backgrounds, and our broad scope of units we are ready to complete your greenhouse irrigation projects.

We are involved in the process and make sure you can provide quality crops to consumers.

It's in our DNA

Living in "het Westland" we live, breath and work with horticulture everyday.

It's all-in the water

Engineering circular water systems for horticulture
